

About Bytamic

Bytamic is an international IT-services and Consulting company with its headquarters in Vienna, Austria and subsidiary companies in Warsaw and Poznań. We work with multinational companies and we drive digital transformation for our clients. We are truly agile, work with the latest technologies and our engineers and scrum-teams deliver state-of-the-art product development services for our clients. Delivering with highest quality standards is key to us – therefore we focus on continuous training & education of our engineers.

Technical Lead/ Java Developer (Warsaw/Poznań and also fully remote)

About your role

We are looking for a Technical Lead Java Developer to technically lead a multidisciplinary team of 2-3 backend developers and 2-3 frontend developers. As a member of the architecture board, you will be the Owner of Service Architecture and Service Data Model. You will support our Product Owners for road map definition, manage the software development life cycle, from planning and prioritising to testing and release. If you have hands-on experience developing software with agile methodologies and are ready to lead our professional developers, we'd like to meet you. Ultimately, you will deploy and maintain functional, secure and high-quality applications.

Your tasks

Your main focus area will be to:

- ❖ Collaborate with product owners to plan different releases, epics and stories
- ❖ Participate in workshops & coordinate the work within the team
- ❖ Active participation to the Architecture Board
- ❖ Technically lead a team of 4-6 Software Developers
- ❖ Ensure our applications are secure and up to date
- ❖ Ensure Code Quality by doing Code-Reviews
- ❖ Partake in Java coding for around 50% of the time
- ❖ You will oversee technical Dept Management

Your qualifications

- ❖ Experience designing, building, and testing java applications (Spring Boot)
- ❖ Work experience as a Senior Java application Developer
- ❖ Problem-solving abilities
- ❖ Basic understanding of Single Page Application development for Frontend (ReactJS / NextJS)
- ❖ Experienced in Technically Leading & Coordinating a Software Development team.

- ❖ Very capable in the area of Technical Business Analysis in order to fully understand product needs & provide the best solutions.
- ❖ Experience in DevOps tools is a big plus (CI/CD, Terraform, cloud & containerization technologies)
- ❖ BSc in Computer Science, Engineering, or relevant field
- ❖ Good knowledge of English
- ❖ Ideally, you bring also (some of) the following: experience as Solution Architect, experience with Salesforce

What you can expect from us

- ❖ Working with latest technologies
- ❖ Lots of career development potentials
- ❖ International clients with challenging projects (usually product/feature development)
- ❖ International software development teams with distributed delivery groups
- ❖ Remote work and flexible working hours
- ❖ Private healthcare and Multisport card
- ❖ Training & education
- ❖ Attractive remuneration
- ❖ Language classes (usually business English; but not limited to)
- ❖ Modern computer equipment, incl. Apple device policy
- ❖ Employee referral programme
- ❖ Integrational meetings & events
